Since we opened our doors in 1986, The Wakefield Corporation has consistently provided a quality product at a competitive price with exceptional service and on-time delivery. Our clients truly recognize TWC's "Dedication to Excellence".

The Wakefield Corporation's reputation for excellence has meant steady growth and an expanded client base. This reputation has led TWC to building projects outside the immediate area, as well as outside the state.

As our business has continued to grow and expand, The Wakefield Corporation's dedication to excellence has not diminished, and in fact, has grown with the company's growth. It is the people of The Wakefield Corporation who have made the difference and have allowed us to develop and maintain our image as the premier drywall contractor in East Tennessee and surrounding areas. Our estimators, project managers, and construction superintendents and foremen have over 300 years of combined experience.

As we celebrate over 20 years in business, The Wakefield Corporation commends our employees and customers for helping us build a *legacy of excellence*.

For over 20 years, The Wakefield Corporation's focus has been on one thing and one thing only - **EXCELLENCE**. This focus has resulted in excellence in construction and excellence in service.
